Skills

Programming language: Typescript, Javascript, Java, PHP, CSS and SASS

Framework/ library: React, Next JS, Node JS, GraphQL, WordPress,, Tailwind, bootstrap, Cypress, Jest, Playwright and Puppeteer..

Tools: AWS, Google Adsense, Jenkin, Hubspot, Opgenies, Argo CD, Splunk, Figma, Jira, Contentstack, Asana and Docker

Experience

FPT / Software Engineer

MONTH 2023 - PRESENT

- Lead the team to ensure tasks are delivered on time.
- Develop and maintain web applications.
- Design and create reusable components to enhance development efficiency and code maintainability.
- Led the design and implementation of two internal project websites for clients in the insurtech industry, focusing on developing efficient internal tools. I collaborate directly with clients on-site to gather and analyze requirements, ensuring solutions meet their needs and expectations.
- Delivering a seamless user experience, and troubleshoot development issues to maintain high standards of code quality and performance.

Tech stack: React, React hook, styled-component, Next JS, Typescript, Javascript, Node JS, Jest, Cypress, and Jenkin

MoneyHero Group / Software Engineer

MONTH 2020 - 2023

- Developed in-house UI design system components for Hyphen's platforms, including Money101, Moneyhero, and Singsaver.
- Supported internal campaign launches using the Hubspot platform.
- Collaborated with the analytics team to monitor user behavior.
- Designed end-to-end technical solutions to ensure both functionality and feasibility of internal requirements.
- Adhered to defect and issue tracking procedures to assign tasks, track progress, and maintain quality.

Achievement:

- Boosted customer conversion rate by adding "Add to Favorite" feature on Money101.
- Developed social media and messenger sharing features for Money101, enhancing company awareness.
- Revamped UI/UX for Singsaver's personal loan user journey.
- Unified blog design across 6 markets on WordPress within 3 months.

Tech stack: React, Next JS, Typescript Javascript, Node JS, GraphQL, WordPress, PHP, Jest, Cypress Docker, Hubspot, Google AdSense, AWS, Opgenies, Argo CD, Splunk, Figma, Jira, Contentstack, and Asana.

MoneyHero Group / Junior Software Engineer

- Developed new features and maintained Moneyguru, Comparehero, and Moneymax websites.
- Worked as a Project manager to gather business requirements, provide solutions to the stakeholders, and deliver within the given project timeline.
- Improved the performance of Lighthouse score for SEO.
- Contribute to the Reward platform for Singsaver.

Achievement:

- Created a new vertical called "Car loan" which helps Thailand's market gain more revenue stream.
- Implemented Webboard to create a community for sharing financial knowledge.
- Implemented coupon codes for marketing purposes.
- Created the promotion page for the marketing team to enhance their campaign.
- Implemented the advertising banner with Google AdSense.

Tech stack: WordPress, PHP, JS, CSS, SCSS, Bootstrap, AWS lambda, s3 bucket, Node js and GraphQL. Argo CD: monitor for deployment process, Splunk: monitoring logs, AWS CloudFront: invalidating Cloudfront.

Pomelo / Senior Associate Quality Assurance Engineer

MONTH 2019 - MONTH 2020

- Works closely with the developers and designers of a team. Analyze users' requirements in order to ensure the quality in final product.
- Design and execute test plans, scenarios, scripts and procedures based on product requirements.
- Manage defects tracking and follow-up both internally and by customers.
- Develop and manage standards, methods, or procedures to determine product quality.

Achievement:

- Lead automation project on end to end testing (Web, IOS and Android) platforms by using test projects and API automation via POSTMAN.

Wongnai / Quality Assurance Engineer

MONTH 2019 - MONTH 2020

- Work as software tester in the scrum to review functional and technical requirements to ensure product quality by manual testing and automation using Puppeteer

Achievement: - Implement manual end-to-end test to automation test.

Tech stack: Javascript and Puppeteer

PTT DIGITAL SOLUTION / Quality Assurance Engineer

- Reviews functional requirements and technical specifications with Project Management and Development staff to ensure full understanding of deliverables.

Achievement

2021-2022 Employee of the month by Hyphen group on Winning as a team prize and Put people at our heart.
