SUMMARY

Senior Software Engineer with over 6 years of experience developing scalable, high-performance web applications using Next.js, React, and TypeScript. Demonstrated success in delivering revenue-generating features, enhancing conversion rates, and optimizing SEO and performance metrics. At Kaidee, responsible for maintaining and developing new features across the Kaidee marketplace platform, designing scalable frontend architecture, and delivering seamless end-to-end user flows. Expertise includes performance optimization, system design, and user-centric product development. Passionate about AI-assisted engineering workflows, with practical experience leveraging Claude Code, AI agents, Kiro, and LLM-driven development tools to boost developer efficiency, automate workflows, and accelerate product delivery.

EXPERIENCE

Senior Software Engineer

Kaidee

October 2024 – Present

- Led frontend development across multiple product verticals, supporting 3 business units by enhancing UI consistency and significantly reducing UI-related issues.
- Launched Pinned Ads, a revenue-generating feature with integrated booking calendar and end-to-end payment flow, increasing monthly orders by over 150.
- Developed and launched Storefronts and User Reviews, boosting user engagement by 15% and reinforcing user trust signals.
- Redesigned ad cards and homepage UI, resulting in higher click-through rates.
- Created Premium Amulet, establishing a new monetization stream contributing 2% to category revenue.
- Implemented SEO optimizations, increasing organic traffic by 5% and achieving a Lighthouse SEO score above 80.
- Optimized CMS platform, reducing content publishing time and improving cross-team operational efficiency.
- Built Okai Job Platform, enabling complete job search and recruitment workflows.
- Engineered reusable components and design patterns, cutting development time by 25% and enhancing code maintainability across teams.

Senior Software Engineer

FPT software

April 2023 – October 2024

- Led a cross-functional development team of 5-7 members to deliver a back-office web application supporting 2 business units, ensuring timely delivery from initial scoping through to production deployment.
- Developed and maintained scalable web applications, improving system reliability and stability.
- Created reusable component libraries and shared modules, reducing development time by 10% and enhancing code consistency across multiple projects.
- Owned and maintained 2 internal platforms for insurtech clients, ensuring high availability and optimal performance.
- Optimized application performance and frontend efficiency, significantly decreasing page load times.

Software Engineer

MoneyHero group

March 2020 – February 2023

- Supported internal campaign launches across multiple markets, facilitating the successful delivery of over 10 campaigns per quarter.
- Collaborated with analytics teams to track user behavior and identify optimization opportunities, improving data-driven decision-making efficiency.
- Increased conversion rate by 12% through implementing the “Add to Favorite” feature on Money101.
- Developed social media and messenger sharing features, boosting user acquisition and content sharing by 3%.
- Revamped UI/UX for SingSaver’s personal loan journey, enhancing user engagement and reducing drop-off rates by 8%.
- Unified blog design across six markets within three months, improving design consistency and reducing maintenance efforts.
- Acted as Project Manager to gather business requirements, align stakeholders, and deliver projects on schedule, achieving 100% on-time delivery.
- Improved SEO performance by increasing Lighthouse scores from 70 to over 90, resulting in a 6% rise in organic traffic.
- Launched the Car Loan vertical for the Thailand market, driving category revenue growth.
- Implemented advertising solutions using Google AdSense, increasing ad revenue.

Senior Quality Assurance

Pomelo

December 2019 – March 2020

- Led comprehensive end-to-end automation testing across Web, iOS, and Android platforms, elevating test coverage to 90% and enhancing release confidence.
- Developed and executed automated API test suites using Postman, significantly reducing manual testing efforts.
- Enhanced defect detection rates through robust automation strategies and thorough regression testing.

Quality Assurance

Wongnai

February 2019 – August 2019

- QA engineer in an Agile/Scrum team, reviewing functional and technical requirements to ensure high product quality and release readiness.
- Executed manual and automated test cases, boosting test coverage to 90% and enhancing overall product reliability.
- Developed automation scripts with Puppeteer, significantly reducing regression testing time.
- Identified and reported critical defects early in the development cycle, minimizing production issues.

EDUCATION

Bachelor of Engineering, Information and Communication Engineering

CHULALONGKORN UNIVERSITY • 2014-2018

AWARDS & HONORS

Employee of the month

Hyphen group • 2021-2022

- Winning as a team prize and Put people at our heart.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Styled-components, Ant Design, WordPress, PHP.

Backend: Node.js, GraphQL, REST APIs.

Testing: Jest, Playwright, Cypress, Puppeteer, Postman.

AI/LLM Tools: Claude Code, Kiro, AI Agents, Prompt Engineering, LLM-assisted Development.

Cloud & Infrastructure: AWS, GCP.

CI/CD & DevOps: CircleCI, Jenkins, Argo CD, Docker.

Monitoring & Analytics: Splunk, Google AdSense.

CMS & Marketing Tools: Contentstack, HubSpot, Semrush, Strapi.

Collaboration & Project Management: Jira, Asana.

Version Control & Design: Git, Figma.

Others: SEO Optimization, Performance Optimization, CI/CD, Agile/Scrum.
